

**STOP: Servitude Encroachment**

Do not build on water pipelines, as this may lead to pipe bursts, flooding, or even worse, loss of human lives and death of animals.

How to identify uMngeni-uThukela Water Infrastructure?

- White markers with UUW written in black, 100m apart from each other
- Chambers (with metal lids).

**STOP: Illegal Water Connections**

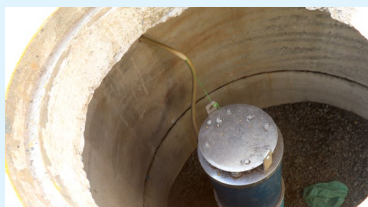

Report illegal water connections.

Illegal connections contribute to leaking pipes that disrupt the water supply.

- Be responsible and pay for water services provided by the Municipality.
- Paying for services you have received is ethical.

**STOP: Infrastructure Vandalism**

Cables, Air valves, and Chambers are susceptible to vandalism and or theft.

Vandalising infrastructure causes Interruptions to the water supply.

**STOP: Illegal Sand Mining**

Illegal Sand Mining causes riverbank erosion, flooding, poor water quality, and reduced water quantity. This results in high water treatment costs.

Although sand-mining contributes to job creation, when done illegally, it has harmful effects to the environment and water resources

**STOP: Illegal Dumping**

uMngeni-uThukela Water urges you to STOP

- Building toilets close to rivers and streams.
- The illegal disposal of sewage, industrial effluent, and solid waste into sewer systems and manholes.

This behaviour results in blockages of sewer pipes, and it increases the cost of water treatment.

Report any illegal dumping to your Local Municipality.
